Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

In a user registration system, there is a requirement to implement a username validation module. Users attempting to register must adhere to specific criteria for their usernames to be considered valid.

Your task is to develop a program that takes user input for a desired username and validates it according to the following rules:

The username must not contain any spaces. The username must be at least 5 characters long.

Implement a custom exception, `InvalidUsernameException`, to handle cases where the entered username does not meet the specified criteria.

Input Format

The input consists of a string S, representing the desired username.

Output Format

If the username is valid, print "Username is valid: [S]".

If the username is invalid:

1. If the username is short, print "Invalid Username: Username must be at least 5 characters long"
2. If the username contains spaces, print "Invalid Username: Username cannot contain spaces"

Refer to the sample output for formatting specifications.

Sample Test Case

Input: John

Output: Invalid Username: Username must be at least 5 characters long

Answer

// You are using Java

```
import java.util.*;
```

```
class InvalidUsernameException extends Exception{
```

```
    public InvalidUsernameException(String e){
```

```
        System.out.println(e);
```

```
    }
```

```
}
```

```
class validUsername{
```

```
    public static void main(String args[])throws InvalidUsernameException{
```

```
        Scanner sc = new Scanner(System.in);
```

```
        String user=sc.nextLine();
```

```
        try{
```

```
            int chars=0;
```

```
            for(char c:user.toCharArray()){
```

```
                chars++;
```

```
                if(c==' '){
```

```
                    throw new InvalidUsernameException("Invalid Username: Username cannot contain spaces");
```

```
                }
```

```
}  
    if(chars<5){  
        throw new InvalidUsernameException("Invalid Username: Username  
must be at least 5 characters long");  
    }  
    else{  
        System.out.println("Username is valid: "+user);  
    }  
}  
catch(InvalidUsernameException e){  
}  
}  
}
```

Status : Correct
